| HT1 region (long term) | 3200 | KC1 region (day) | 6500 |
| HT2 region (week) | 4200 | KC2 region (week) | 6800 |
| HT3 region (day) | 5580 | KC3 region (long term) | 7200 |
| HT4 region | - | KC4 region | - |

The BTC after reaching the December HT1 (\$ 3200) bottom has a reversal and rising continuously with the confirmation of increasing volume, the peak of breaking the \$ 4200 zone on April 2, 2019 with the volume delivered. translated to 54,127 units.

- Then the lines EMA300, EMA200, EMA100 turn out to be above and hold on HT3 (\$ 5580).
- This confirms that cash flow is returning to BTC with the best support level in HT2 region (\$ 4200)
- Although the current price has just surpassed the KC1 (\$ 6,500) - a strong resistance in the short term but the price is increasing but lacks the resonance of the same volume and close to the KC week and important KC \$ 7,200. There is a possibility of technical correction here before returning to the uptrend.

Investment recommendation:

- Investors limit chasing buys or may hold buying positions if available when prices surpass KC1 (\$ 6,500) and move up.

| vùng HT1 (dài hạn) | 104 | vùng KC1 (ngày) | 183 |
| vùng HT2 (tuần) | 122 | vùng KC2 (tuần) | 220 |
| vùng HT3 (ngày) | 146 | vùng KC3 (dài hạn) | 255 |
| vùng HT4 | 164 | vùng KC4 | - |

- ETH after reaching the bottom in December (\$ 83 area) shows signs of reversal and increases continuously with confirmation of increasing trading volume, the peak of breaking the price range of \$ 164 and turning this area into the current HT area. at HT4 (\$ 164) on April 2, 2019 with trading volume of 575,211 units.
- ETH is not as strong as BTC so there is a HT4 retest (\$ 164) and keep going up
- Although not as strong as BTC, cash flow is returning to ETH with the best support level in HT3 region (\$ 146)
- However, the current price is touching the area KC1 (\$ 183) coinciding with the EMA200 - quite strong resistance - and there are signs of creating a price reversal signal (note that on 7 May 2019, there is a sign of selling. profit taking).
- If you want to break the KC1 area (\$ 183), confirmation of buying volume is required. This ability is currently not high.

Investment recommendation:

- Investors consider selling off existing ETH to reduce the proportion of safe areas, prepare for the downward trend after the increase - Or keep the position of derivative if any.
- Redeem when price touches HT4 (\$ 164) or HT3 (\$ 146) and bounces back

- IZI issued on 6 May 2019 increased continuously from \$ 0.1 to \$ 0.24648 (up 246.48%) along with increasing volume continuously confirming the cash flow appeared and that IZI price increased.

- After the price corrected from **KC2 (\$ 0.24668)** and hit **HT3 (\$ 0.20516)** and went up and the trading volume continued to increase, showing that the demand did not weaken but also continued to rise.

- The current price is conquering the **KC1 area (\$ 0.22858)** and there will be signs of breaking through this resistance soon, if the price touches the area.

HT3 (\$ 0.20516), there is a high probability that there will be a strong buying force pushing prices up again.

- Besides, IZI also has strong support level in **HT2 (\$ 0.18654)** with the support from volume showing the buying demand of IZI investors.

Note:

- Price is fluctuating in a range of \$ 0.205-0.23.

4. Some general investment recommendations for the cryptocurrencies market:

- Currently, the price increases mainly focus on BTC, short-term investors can take advantage of surfing at the KC and HT regions of each coin as analyzed above.

- Medium-term or higher investors can wait for a period of time and decide to buy when there are signs of confirmation of price increase, especially when the BTC overcomes the important KC mark of \$ 7,200 can activate the cash flow into the money market. stronger numbers.
